Automated biotechnological treatment for garbage compactor

An exclusivity of NuBarbados

WHY NU-ODOR-SYSTEM™?

- Eliminates unpleasant odours
- Long lasting effect
- Efficient in high and humid temperatures
- Controls odours without having to refrigerate the area
- 100% automated
- Complete management assured by our empowered technicians
- The system is 100% ergonomic, requiring a minimum of space
- Installation by our empowered technicians: system requires only one 120vAc connector
- Product complies with the most stringent environmental requirements

CHARACTERISTICS

NU-ODOR-SYSTEM™ injects Canada Innu-Science biotechnological products on a daily basis. The bacteria in the product biodegrades organic matter and emit water and carbon dioxide as well as a light fresh odour. It mists the interior walls of hood with a bio film of inoffensive bacteria which transform the accumulations of grease into biodegradable nonpathogenic matter. Dedicated software manages the product distribution.

PRODUCT

Nu-Odor (par Innu-Science Canada Inc.)

- World unique technology
- Entirely biodegradable
- Not corrosive
- Certified by Environmental Choice
- Neutral pH
- No toxic vapors or leeching
